INTRODUCTION	

1. INTRODUCTION

1.1. Document Purpose

This document presents the high level and business requirement BPMs for Reference Data Management. Annexes to this report contain the model graphics and business requirements that support the readability of this report.

1.2. Deviation From TEMPO

The following TEMPO sections are not part of this document:

- Sign Off list;
- Distribution List;
- Scope;
- Applicable Documents;
- List of Tables;
- List of Figures.

The following TEMPO sections are added to this document:

- Project Ownership;
- Intended Audience.

1.3. Assumption and Constraints

The reader should have a basic knowledge of the levelling guidelines [R01].

1.4. Project Ownership

The unit DG TAXUD/C2 is the project owner of this Excise High Level and Business Requirements BPM Report.

1.5. Intended Audience

1. The purpose of this document is to establish a common understanding between readers that are familiar with the applicable documents and may belong to the following categories:

- Any person responsible for the Excise - EMCS business / system processes, requirements, functional specifications or conformance testing;
- Any person responsible for the Export - AES business / system processes, requirements, functional specifications or conformance testing;
- Any person of the development team of DG TAXUD/C5 who will use this document as a reference during the development cycle;
- Any person from the DG TAXUD units who has to verify whether the current document is consistent with the applicable documents and depicts the solution to be followed;
- Any Member State (MS) or Trade representatives who have to identify the actions, implications and consequences on their national domain, including both business people and people having an IT background.

1.6. Structure of Document

This document is organised as follows:

- Introduction;

EU Customs High Level and Business Requirement BPM Report	REF: EU Customs High Level and Business Requirements BPM Report for Reference Data Management
Excise High Level and Business Requirements BPM Report for - Reference Data Management	
INTRODUCTION	

- References, containing a list of acronyms and abbreviations and the documents referenced in this report;
- Document History, listing the different versions and submission dates of this report;
- High Level Business Overview, providing an overview of the business domain and the actors, and mentioning the legal units responsible for the business domain covered in this report
- Process Models, visualising in separate sections information from the high level and business requirement BPMs relating to the business domain covered in this report.

In a separate report, the following related annex may be found:

- Annex 1: Model Graphics
- Annex 2: Business Requirements, providing a list of all business requirements for the processes covered in this report
- Annex 3: List of Amendments.

HIGH LEVEL BUSINESS OVERVIEW	

4. HIGH LEVEL BUSINESS OVERVIEW

4.1. Business Domain Overview

Registration and Authorisation Data Management TO-BE domain encapsulates all processes that make up the the management of registration and authorisation of the data regarding excise movements under duty suspension and under duty paid B2B arrangements.

4.2. Actors

ACTOR	ROLE
Commission	In accordance with Regulation No 612/2013, Paragraph (3), Paragraph (10), Regulation No 389/2012, Art. 19(4), the Commission is the executive body responsible to operate the central register of economic operators (Central Register) as a part of a computerized system in a manner that ensures at all times a correct up-to-date view of the national registered data provided by all Member States. Additionally, is responsible to extract statistical information from the register and deliver it to the Member States on a monthly basis. Finally, the Commission shall establish and maintain a list of the responsible central excise liaison offices or liaison departments on the basis of information provided by the Member States and shall make that list available to Member States. The Commission is also the executive body responsible to operate the Central Reference Database.
Excise Authority	N/A
Economic Operator	In accordance with the introduction of the Council Regulation (EU) No 389/2012 (paragraph 10), Economic operator means a person who, in the course of his business, is involved in activities covered by legislation on excise duties, whether authorised to do so or not.
MSA	Each Member State Administration ensures that the information contained in the national reference database is complete, accurate, up to date and ready to be used.

4.3. Legal Units

The following legal units are responsible for the business domain: DG TAXUD.

- C2

EU Customs High Level and Business Requirement BPM Report	REF: EU Customs High Level and Business Requirements BPM Report for Reference Data Management
Excise High Level and Business Requirements BPM Report for - Reference Data Management	
PROCESS MODELS	

5. Process Models

This section provides the full business process documentation of the processes within the scope of this business domain.

For each business process the process details, such as assumptions and reference documents, are documented. In addition a set of tables describe each process flow component (events and tasks) with further details regarding their legal references and additional descriptive information where necessary.

In Annex 1 and Annex 2 the related model graphic and business requirements can be found respectively.

5.1. L2 High Level BPM

Reference Documents	N/A

Table 5.1: Process Details

5.2. L3 Business Requirements BPM

5.2.1. Process L3-RDM-01-01-Maintenance and dissemination of reference data other than the EOL

5.2.1.1. Objective of Process

Reference data is of a great importance to the correct functioning of the Excise Movement and Control System (EMCS). Therefore, the reference data should be accurate and up-to-date at all times. Both the Commission and the Member States share a responsibility to update the reference data in their respective databases. The Commission is responsible for updating all the reference data stored in the Central Reference Database and for its dissemination to the MSAs at a given number of days before the reference data becomes applicable according to the validity dates indicated in the records. The MSAs have to be able to receive the reference data changes and to incorporate them into their national databases as soon as possible and at the latest by the date and time when the reference data becomes applicable.

The process starts when the changes to the existing reference data become necessary. Following the instructions of the Commission, the reference data has to be updated. A responsible official incorporates and afterwards registers the modifications of the reference data in the Central Reference Database. Those modifications can be the creation, update or invalidation of a specific record in the reference data.

Once the Central Reference Database contains consistent and up-to-date reference data, the updates are ready to be communicated to the Member States (upon a predefined scheduling or upon an explicit request).

The Commission will disseminate the reference data modifications to those MSAs which are registered to receive notifications of modifications using 'Operations to the reference database' message. For this reason, before dissemination, the Commission will check the Member State profiles to find out whether there are any

EU Customs High Level and Business Requirement BPM Report	REF: EU Customs High Level and Business Requirements BPM Report for Reference Data Management
Excise High Level and Business Requirements BPM Report for - Reference Data Management	
PROCESS MODELS	

Member State Administrations that are registered to receive such notifications. The Commission then forwards the notification of modifications to the registered MSAs.

Upon receipt of the 'Operations to the reference database' message, the MSA incorporates the received changes to its national reference database. In this way, the national reference database contains up-to-date reference data and the process ends at the side of the MSA.

PROCESS MODELS	

5.2.2. Process L3-RDM-01-02-Consultation of reference data by MSA central services

5.2.2.1. Objective of Process

The purpose of this model is to depict the reference data consultation process initiated by a MSA. Consultation of the reference data other than the EOL allows the MSA officials to perform a search on the Central Reference Database kept by the Commission.

This consultation is for any purpose, however, it is in particular recommended as the first step of recovery:

- if an incoming message found correct in another Member State is found incorrect in the considered Member State for reasons linked with the reference data; or
- if an outgoing message found correct in the considered Member State is found incorrect in another Member State for reasons linked with the reference data.

An official in the MSA concerned about the inconsistencies of the reference data will prepare a common request, indicating specific search criteria, which is to be sent to the Commission. Upon receipt of the common request, the Commission will prepare a response message to the requesting MSA. The response message will contain the compiled information, based on the requested search criteria. The Commission will provide the requesting MSA with this information. With the response message from the Commission, the concerned MSA receives the requested modifications that have been applied to the Central Reference Database. The process ends.

Table 5.21: Event Requested reference data modifications provided

5.2.3. Process L3-RDM-01-03-Consultation of public reference data by economic operators

5.2.3.1. Objective of Process

The economic operators get the necessary reference data from their respective MSAs. That data contains a part of codes (including the categories of excise products and excise product codes, etc.) as defined in Excise BPMs and artefacts. Each MSA is responsible for making the applicable reference data available to its economic operators. The details of distribution of the publicly available files are defined by each MSA.

This process depicts the option when an economic operator requests the Commission to provide reference data using an external request for reference data.

Upon receipt of the external request for reference data, the Commission prepares the requested list of codes. The Commission sends the requested list of codes to the economic operator.

The economic operator receives the external list of codes, which also means that he gets an up-to-date copy of the requested reference data. The process ends.
